- (5) 36 – 37
- (6) 41

4. Find the correct meaning.

- (1) **4** (2) **2** (3) **3** (4) **3**

Teil D Sprachmittlung

Autofreie Innenstädte

Sehr geehrte Mitglieder,

wie kommen wir der Vision einer autofreien Stadt näher? Berühmte Metropolen in Europa zeigen uns bereits gute Beispiele dafür, wie man sich dieser Vision nähern könnte. Zum einen können wir die Anzahl von Parkplätzen im Zentrum verringern und gleichzeitig die Parkgebühren in dieser Zone erhöhen. Damit es für Fußgänger und Fahrradfahrer zudem attraktiver in den Städten wird und mehr auf ihr Auto verzichten, könnten wir die Wege für Fußgänger und Radfahrer ausbauen. Wir könnten außerdem ganze Stadtbezirke als autofrei erklären, wie es auch in Barcelona der Fall ist. Alle diese Maßnahmen haben weitreichende positive Effekte. Nicht nur reduzieren wir den Verkehr in unserer Stadt. Es wird auch deutlich weniger Straßenlärm geben und der geringere Ausstoß von Autoabgasen verbessert die Luftqualität. Insgesamt wird so auch der öffentliche Personennahverkehr häufiger genutzt und Staus können reduziert werden. Oslo öffentlicher Personennahverkehr soll außerdem bis 2028 elektrisch und emissionsfrei werden. Das ist doch ein tolles Vorhaben, was wir auch für unsere Stadt angehen können. Oder wir folgen dem Beispiel aus London, die bis 2030 als Stadt komplett klimaneutral sein wollen. Das nenne ich mal ein tolles Ziel. Könnten wir sowas gemeinsam nicht auch in unserer Stadt schaffen?

Teil E Text- und Medienkompetenz

Solar-powered school busses (SPSB)

SPSB is a major e-transportation project in the US with many advantages. First of all it's better for our health because no emission means no air pollution. In this way people have a better physical condition and the costs for medical help are lower.

The next aspect we should focus on are the costs. SPSB's are subsidised by the school district as they cost twice as much as diesel buses.

Regarding jobs, the increase of the e-sector industry is significant because there are more than 2.500 new jobs due to solar vehicles.

Of course we need to have our future in mind. As SPSB's have big batteries they can be used as energy storages and the remaining power could go to cities.

Subject: Enquiry for our sustainable final class trip with bicycles

Dear Sir or Madam,

I'm writing to you because we are planning our final class trip. As we prefer sustainable traveling we will all bring our bikes.

First of all here is some information about us. We are a group of 26 students. Our trip should start on 15th July 2024 and we would like to stay for five nights. The accommodation we're going to stay in shouldn't be too expensive. I think 50 pounds each per night should be ok. Breakfast and an evening meal should be included. As we bring our bikes there should also be a garage or some other safe space where we can lock our bicycles. That's all about us.

Now I would be pleased if you could answer a few questions.

First of all could you please offer us suitable accommodation possibilities? During our trip we would like to go on bike tours so could you please send us a list of suitable tours nearby? We are also interested in other activities. Maybe you could suggest some?

How much will our trip cost and do you offer discounts for students or groups?

Do you need any important documents or insurances? If yes please let us know.

We are all excited about our final trip and I'm really looking forward to hearing from you soon.

Yours sincerely

Luisa Schmidt

„Green“ sightseeing

Last summer Alex wanted to try something new so he went on a „green“ sightseeing tour. The most special thing about the tour was the fact that he was traveling by „Cleanbus“, which only needed electricity instead of petrol or diesel. When Alex got on the bus he realized that there wasn't even a steering wheel. There was just a monitor. This aspect made him feel a bit nervous but he enjoyed the ride. After some time the tour guide had to charge the electric bus so Alex hopped off and took some photos of a castle which was incredibly beautiful. The sun was shining and the flowers were so colourful. There also was a little table with delicious snacks and drinks which were included during the tour. Some other tourists were already eating but Alex was still fascinated by the beautiful castle. „Everybody back on the bus!“ shouted the tour guide. „In my opinion we could have stayed longer. This is such a beautiful place.“ said Alex to another tourist. Everybody hopped back on the bus and the Cleanbus brought Alex and the other tourists to the next sights. Alex was really happy about having been a part of this tour and he would definitely recommend it to his friends.
