

W2 Growing Seeds

You need:

- a flowerpot
- soil
- seeds
- water
- label

How to do it:

1. Fill the flowerpot with soil.
2. Place the seeds on top of the soil.
3. Cover it with soil.
4. Water it gently (too much water will wash everything away).
5. Write the names of all group members on the label and stick it on the flowerpot.
6. Find a shady spot in the classroom and place it there.
7. Wait.
8. Keep the soil moist and do not allow the soil to dry out.
9. As soon as the leaves appear move it to a more sunny location.
10. What kind of plant is it?
11. Check the plants every day.

Go to your local garden center to get all these things. These sentences may help you:

Excuse me, do you sell ...?  
 I would like to buy some ...  
 I think I also need some ...  
 Thank you for your help!
